

Dear Sirs,

I am a new subscriber to what I find to be a wonderful service that is provided by XM Radio. With XM radio I can get my local traffic and weather all the time (when I need it), and listen to a wide variety of news and music. We recently used this on a trip from Houston to Nashville and loved the convenience of a constant, uninterrupted signal with which to listen to our favorite news and music.

Please do not accept the NAB's petition 04-160... I do not want limits imposed on this new, useful and innovative service.

Respectfully,

Lyle D Dixon  
Houston, Texas
